

Thomas Lindstrøm

is a combined designer and developer with broad expertise and over 10 years of experience. He has previously filled roles as art director, development manager, systems architect, product manager, front/back-end developer, user interface/experience designer, and graphic designer – most often in combination. In addition, he has worked with production of video, music/sound, and hardware.

Today he works from his own consulting firm «**nattskiftet as**» (the night shift). <https://nattskiftet.no>

Selected projects

The Conversion Duck

IDEA, DESIGN, DEVELOPMENT – FOR AGDER MEDIA AS

A present for newspapers in the portfolio. Featured in [Medier24's article on the newspaper Raumnes](#), where a duck is placed – and «quacks» every time someone buys a subscription. [Click here to watch a video with it in action.](#)

C, JAVASCRIPT, NODE.JS, SOCKET.IO, EXPRESS.JS, AWS, RASPBERRY PI, SOLDERING & WIRING

Alpha Omega (web- & mobile app)

IDEA, DESIGNER, DEVELOPMENT, DISTRIBUTION – FOR AGDER MEDIA AS

Progressive web app that «feels native», launched on Google Play and the iOS App Store. I built a back end service to handle the traffic from the apps, since the CMS didn't. With infinite scroll, pull to refresh, swipe gestures, and image gestures – built from the ground up. Also trained an AI to learn whether or not text would look good on top of the article images.

[Click here to get a feel for what it was like to use the app.](#)

HTML, CSS, JAVASCRIPT, REACT, NODE.JS, AWS, AI, OPENCV, OBJECTIVE-C, JAVA, IOS, ANDROID

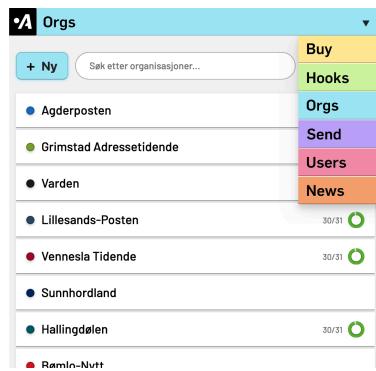

Papir (digital lifecycle for newspapers)

IDEA, DESIGNER, DEVELOPMENT – FOR AGDER MEDIA AS

Handles user authentication, orders, customer self-service, customer messaging, and more. Papir was eventually acquired by Agder Media AS. It has several administrative interfaces where employees work daily, and runs on 25+ Norwegian newspapers.

HTML, CSS, JAVASCRIPT, NODE.JS, REACT, AWS, GCP, FIREBASE, NOSQL, SERVERLESS

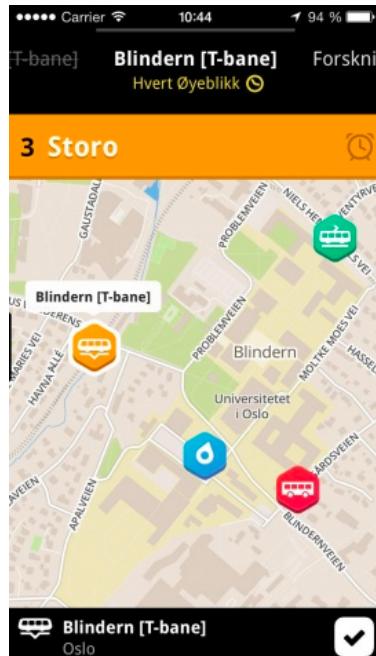

Hvert Øyeblikk («soon») (iOS app)

IDEA, DESIGNER, DEVELOPMENT, DISTRIBUTION

Public transportation (especially in a city you don't know) used to be quite difficult before Google Maps, and official solutions were launched. Hvert Øyeblikk was developed and launched in 2013 and included both static and real-time information on public transportation throughout Norway for bus, train, tram, ferry, and metro.

Simple visualisation of the stops in relation to your location on a map was the main functionality. Especially useful in new cities. You could also, with one touch, set up an alarm that went off when you had to leave your position to make the departure.

HTML, CSS, JAVASCRIPT, NODE.JS, REACT, OBJECTIVE-C, IOS

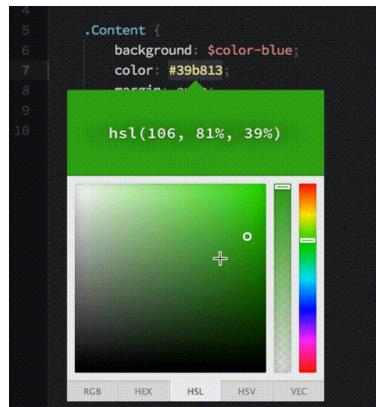

Atom Color Picker (editor widget)

IDEA, DESIGNER, DEVELOPMENT

Atom is a «hackable» text editor. Color Picker became the most downloaded widget in the Atom Store and was featured on the front page.

When writing this, the plugin has got over 2 million downloads.

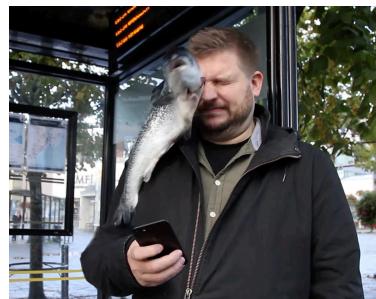

JAVASCRIPT, NPM

«More lively» (commercials)

IDEA, DIRECTOR, PRODUCER – FOR AGDER MEDIA AS

When we launched the new apps for the newspapers in the Agder Media group, we made some commercials based on gestures you could do in the app. Watch them here.

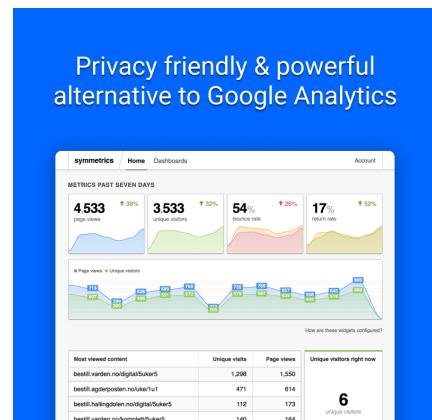

symmetrics (software as a service)

IDEA, DESIGNER, DEVELOPMENT – FOR NATTSKIFTET AS

The first product from **nattskiftet**. A simple, yet powerful, and privacy-focused alternative to Google Analytics. Here, the data collected is safely yours alone, and not used to sell ads.

[Check it out here.](#)

HTML, CSS, JAVASCRIPT, REACT, NODE.JS, AWS, DYNAMODB, NOSQL, SERVERLESS, OPENAI

Work experience

2010-2011

OWNER, DESIGNER, DEVELOPER – VEPS UB (NORWAY)

A small company I set up during high school.

2012-2014

FRONT END-DEVELOPER – STHLMCONNECTION (STOCKHOLM, SWEDEN)

Moved to Sweden immediately following high school and started work at SthlmConnection where we worked with a number of high profile clients such as ICA (retailer).

2014-2017

OWNER, DESIGNER, DEVELOPER – AMPHIBIAN AS (NORWAY)

Moved back to Norway. Built a software-as-a-service product that was later acquired by Agderposten Medier (Polaris Media). It handled the subscription and login flow of their websites.

2017-2018

DESIGNER, DEVELOPER – AGDERPOSTEN MEDIER AS (NORWAY)

Following the acquisition, I worked as a designer & developer at Agderposten Medier where I built tailored software, websites, and mobile apps for their six newspapers.

2018-2020

DEVELOPMENT MANAGER & ART DIRECTOR – AGDER MEDIA AS / POLARIS MEDIA (NORWAY)

Agder Media was acquired by Polaris (Norwegian media company). I managed a team of 3 people, also developing and designing software for the 20+ newspapers in their portfolio.

2020-

OWNER, DESIGNER, DEVELOPER – NATTSKIFTET AS
